

Dental sealants

exSEALANT protection against cavities!

Québec 

Dental sealants

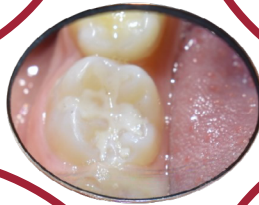

are super effective.

What are dental sealants?

It's a product that infiltrates and hardens in pits and fissures on the teeth.

Who needs dental sealants?

Following a screening by the dental hygienist, the student who needs it will receive a form to fill out and return to the school.

What is the purpose of sealants?

Because the majority of cavities are found on top of the teeth, sealants are the most widely recognized preventive measure, since they create a smooth surface that makes cleaning easier and reduces the risk of cavities.

How are dental sealants applied?

Sealants will be applied at school, during school hours. The sealant is easily applied in a few minutes, without anesthesia or pain, thanks to a simple technique.

Talk to your dentist or dental hygienist about it!

It's a free service at school only.
